NOV 26 2004

Technology Center 2100

**DECLARATION OF BILLY W. HENSLEY
UNDER 37 C.F.R. §§ 1.131**

I, Billy W. Hensley, do hereby declare and say as follows:

1. I am one of the joint inventors of the inventions claimed in the original and pending claims of the above-captioned patent application.
2. I have read and understand the above-captioned patent application, including the original specification and claims. I also have read and understand the Office Action dated May 20, 2004.
3. I have read and understand the following art applied in the Office Action: U.S. Patent No. 6,403,897 to Bluth et al. (hereinafter "Bluth") filed on April 14, 2000.
4. The other inventor and I conceived and invented the subject matter of the original and pending claims of the patent application prior to April 14, 2000, i.e., prior to the filing dates of Bluth, and diligently reduced the claimed invention to practice.
5. Attached as Exhibit 1 is a press release from the Seattle Post-Intelligencer dated December 9, 1999, in which it is reported that Lifeclinic.com, the former assignee of record, had "a newly launched Web site that [will link] consumers to over 10,000 kiosks in pharmacies that

monitor vital signs.” On information and belief, the above statement made in the press release is accurate and true. The “newly launched Web site” mentioned in the article would form the basis for the claims of the subject patent application.

6. Attached as Exhibit 2 is a press release from the Seattle Post-Intelligencer dated December 27, 1999, in which it is reported that Lifeclinic.com, the former assignee of record, was “working on systems that link more than 10,000 monitoring kiosks found in pharmacies and other retail sites; users could download such measurements as blood pressure, pulse and weight into a personal health chart and view that on a Web site.” On information and belief, the above statement made in the press release is accurate and true. The “systems” mentioned in the article would form the basis for the claims of the subject patent application.

7. Attached as Exhibit 3 is a press release that, on information and belief, was published on or about December of 1999. The press release states, *inter alia*, that “Lifeclinic.com will help consumers benefit from the Company’s more than 10,000 vital-signs monitoring kiosks that measure blood pressure and other vital signs that are important to track when managing hypertension.” The press release further states that the system offered “a unique combination of vital-signs monitoring, personal medical record charting and health information.” On information and belief, the above statements made in the press release are accurate and true. The technology mentioned in the article would form the basis for the claims of the subject patent application.

8. Attached as Exhibit 4 is a press release from the Drug Store News dated April 10, 2000, reporting the introduction of “an Internet-enabled version of [Spacelabs Medical’s] 10,000 blood-pressure monitoring consumer kiosks....” The technology mentioned in the article would form the basis for the claimed subject matter.

9. Attached as Exhibit 5 is a printout from MS Visual Source Safe of files of a first program for a kiosk server, which resided at a central computer system. The earliest files listed in Exhibit 5 are dated February 29, 2000. I was involved in the creation of listed files.

10. Attached as Exhibit 6 is a printout from MS Visual Source Safe of files of a second program for a client server, one of which resided at each of the remote kiosks. The earliest files listed in Exhibit 6 are dated February 29, 2000. I was involved in the creation of listed files.

11. On information and belief, and to the best of my recollection, the files listed in Exhibits 5 and 6 and existing before April 14, 2000 included code for allowing each of the methods recited in claims 1-6 and 9-12 and each of the systems recited in claims 7, 8, and 13 to be carried out.

12. With regard to claim 1, the following files existing as of April 14, 2000 allowed claim 1 to be carried out as of April 14, 2000:

providing user information for registered users, the user information comprising medical information specific to the registered users;

Module: LCKioskServer.exe

File(s): threadReceiver.h; threadReceiver.cpp

receiving updates to the user information;

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

generating update user information;

Module: LCKioskServer.exe

File(s): threadReceiver.h; threadReceiver.cpp

for each of the collection kiosks, receiving a request from the collection kiosk for the generated update user information;

Module: LCKioskClient.exe

File(s): threadReceiver.cpp; threadReceiver.h

sending to the requesting collection kiosk the update user information

Module: LCKioskServer.exe

File(s): threadReceiver.cpp; threadReceiver.h

storing the update user information at the requesting collection kiosk for subsequent requests,

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

wherein the collection kiosks use the update user information to verify whether a user is registered.

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

13. With regard to claim 2, the following files existing as of April 14, 2000 allowed claim 2 to be carried out as of April 14, 2000:

wherein the collection kiosks operate as FTP clients and the computer system operates as an FTP server

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

14. With regard to claim 3, the following files existing as of April 14, 2000 allowed claim 3 to be carried out as of April 14, 2000:

wherein the received update user information includes indications of whether to add a registered user, delete a registered user, or change information relating to a registered user

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

15. With regard to claim 4, the following files existing as of April 14, 2000 allowed claim 4 to be carried out as of April 14, 2000:

wherein a collection kiosk sends a request for the generated update user information once a day

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

16. With regard to claim 5, the following files existing as of April 14, 2000 allowed claim 5 to be carried out as of April 14, 2000:

wherein the user information includes a user identifier and a password

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

17. With regard to claim 6, the following files existing as of April 14, 2000 allowed claim 6 to be carried out as of April 14, 2000:

providing user information for registered users, the user information comprising medical information specific to the registered users;

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

sending a request for updated user information;

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

in response to sending the request, receiving the updated user information; and updating the provided user information for the registered user in accordance with the received updated user information so that the collection kiosk can verify whether a user of the collection kiosk is registered; and

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

storing the updated user information at the collection kiosk for subsequent requests

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

18. With regard to claim 7, the following files existing as of April 14, 2000 supported claim 7 as of April 14, 2000:

a central computer system for a web site, the central computer system providing a repository for the information, registering users of the web site, and accessing the information; and

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

a plurality of collection kiosks for collecting information about users, for verifying whether a user is registered at the web site, and for sending the collected information to the central computer system when the user is registered.

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

19. With regard to claim 8, the following files existing as of April 14, 2000 allowed claim 8 to be carried out as of April 14, 2000:

wherein the information is medical information.

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

20. With regard to claim 9, the following files existing as of April 14, 2000 allowed claim 9 to be carried out as of April 14, 2000:

registering the users at the web site when information about a user is collected at one of a plurality of collection kiosks,

Module: LCKioskServer.exe

File(s): threadReceiver.cpp; threadReceiver.h

determining whether the user is registered at the website; and

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

when registered, sending the collected information to a computer system so that the collected information is accessible to the user through the web site.

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

21. With regard to claim 10, the following files existing as of April 14, 2000 allowed claim 10 to be carried out as of April 14, 2000:

wherein a collection kiosk automatically sends a request for the generated update user information periodically.

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

22. With regard to claim 11, the following files existing as of April 14, 2000 allowed claim 11 to be carried out as of April 14, 2000:

wherein said sending a request for updated information is automatic and performed periodically.

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

23. With regard to claim 12, the following files existing as of April 14, 2000 allowed claim 12 to be carried out as of April 14, 2000:

wherein said sending a request for updated information is automatic and performed daily

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

24. With regard to claim 13, the following files existing as of April 14, 2000 allowed claim 13 to be carried out as of April 14, 2000:

the information comprising medical information specific to the registered users;

Module: LCKioskClient.exe

File(s): wndMonitorISP.h; wndMonitorISP.cpp

the central computer system further is for receiving updates to the user information from the collection kiosks, generating update user information, and for each of the collection kiosks, receiving a request from the collection kiosk for the generated update user information and sending to the requesting collection kiosk the update user information.

Module: LCKioskServer.exe

File(s): threadReceiver.cpp; threadReceiver.h

25. I hereby declare that all statements made herein of my knowledge are true and all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the above-captioned patent application or any patent issued thereon.

Signed this 22nd day of November 2004

SPRINT OFFERS ONLINE BUYING VIA CELL PHONE

Quick hits is written by P-I reporters John Cook and Dan Richman. Send comments, questions or suggestions to johncook@seattle-pi.com or danrichman@seattle-pi.com.

This report includes material from Bloomberg News.

TECHNOLOGY Quick hits

Sprint PCS, the Kansas City, Mo., wireless network division of Sprint Corp., said it has begun offering online shopping at Amazon.com Inc. through its Internet-ready digital cellular telephones.

The companies said the electronic-commerce service will sell music, DVDs, videos, books, toys, video games, software and consumer electronics.

Book and music e-tailer barnesandnoble.com last week began offering customer access to its site using the Palm VII wireless hand-held computer. Amazon offers that access, too.

And yesterday's move may distance Amazon from the competition. The Yankee Group says Internet-enabled phones will have 48 million users by 2002 and 204 million users by 2005.

RealNetworks will add computer-linked video

RealNetworks today will announce a partnership with WebGlide, a New York company specializing in computer-generated video technology. Under the agreement, WebGlide will integrate its technology into RealNetwork's to create a product code-named Utopia.

The companies claim Utopia will allow the creation and streaming of computer-generated video at less than 5 percent of the bandwidth required for conventional video.

A beta version of the free Utopia client for Windows and Mac users is expected by July 1.

Corbis hires two execs to get images on Net

Corbis Corp., the digital archive company owned by Microsoft chairman Bill

12/9/99 STLPI C4

Page 2

Gates, hired two new executives, one from rival Getty Images Inc., to help put more of its 65 million images on the Internet.

George Sinclair, a former Getty Images vice president, joined Corbis as director of strategic development. Marjorie Yap, who managed public relations for Wilsonville, Ore.-based Tektronix, the No. 1 maker of electronic-measurement devices, was named director of corporate communications.

Sinclair and Yap will help manage Corbis's effort to become a "one-stop shop" for online art. Corbis, based in Bellevue, has acquired four image archives in the past two years and started selling pictures online last December. It expects 1999 sales of about \$100 million, and has 850 employees.

Sun drops bid to make Java into a tech standard

Microsoft rival Sun Microsystems has abandoned attempts to turn its Java programming language into a technology standard. For over a year the company had been working to have Java approved by the European Computer Manufacturers' Association. But Sun balked when that group requested that Sun turn over all its Java-related trademarks and copyrights, reports CBS MarketWatch.

Big companies like IBM, Hewlett-Packard and Oracle had pushed for Java standardization because they rely heavily on it, but it remains controlled by Sun. They and Sun favor Java in part because it decreases the need for Microsoft software.

Nextlink to invest in service expansion

Nextlink Communications, a telephone company controlled by cellular phone pioneer Craig McCaw, said closely held Forstmann Little & Co. will invest \$850 million to help expand services in exchange for an 8 percent stake.

Nextlink and other fast-growing phone companies need billions of dollars to build networks to handle soaring demand for voice and Internet services. The investment reunites Nextlink chief executive Dan Akerson with the firm where he was once general partner.

Nextlink, which provides phone services to small and mid-sized businesses, needs money to help fund its losses and expand networks in New York, Houston, Los Angeles and other cities.

Nextlink announced earlier this year that it would move its headquarters from Bellevue to McLean, Va.

Snippets

Michael Buhrmann, chief executive at Bellevue's @mobile.com, said the company has won a patent for a wireless instant messaging technology that indicates whether a person is on their mobile phone and allows other mobile phone users to send them instant messages. . . .

Spacelabs Medical Inc., a 41-year-old Redmond medical device company, has hired investment bankers to look into the possible sale of its Lifeclinic.com subsidiary, a newly launched Web site that links consumers to over 10,000 kiosks

12/9/99 STLPI C4

Business

SPACELABS MEDICAL INC.

Spacelabs was one of the earliest technology companies in the Northwest. Founded in 1958 to work with NASA in developing systems to monitor the vital signs of astronauts, the company expanded into the world of patient monitoring systems for hospitals. Today its product lines include critical care monitors, fetal monitors for labor and delivery, operating and emergency monitors, cardiology diagnostic equipment and clinical information systems. Spacelabs has also been involved in the most recent wave of technology development. A subsidiary, Lifeclinic.com, is working on systems that link more than 10,000 monitoring kiosks found in pharmacies and other retail sites; users could download such measurements as blood pressure, pulse and weight into a personal health chart and view that on a Web site. Earlier this month Spacelabs said it had hired an investment banking firm to study a spin-off or other method of financing Lifeclinic.com. The company also plans to enter the wireless clinical messaging market. Spacelabs is doing all this against a backdrop of markets complicated by the Asian financial doldrums and by consolidation among hospitals and health care providers.

Launch of Lifeclinic.com(tm) Announced

Redmond, WA....announcement was made today for the launch of Lifeclinic.com, a hypertension-focused Internet web site. Lifeclinic.com will help consumers benefit from the Company's more than 10,000 vital-signs monitoring kiosks that measure blood pressure and other vital signs that are important to track when managing hypertension. These kiosks are located in pharmacies and other retail locations across the United States and take over 200 million readings for 3 million unique users each year. Lifeclinic.com provides consumers with a resource to help manage their healthcare. The site offers health education focused on hypertension and related topics such as smoking cessation, weight control and stress management. Visitors to the site can find a vital-signs kiosk near their home or shop on-line for items related to blood-pressure management. A daily news service provides current articles about health-related topics. Membership to the site is free and includes a health charting function to track blood pressure, weight and pulse over time. The Company plans to add new features to the charting function as well as new channels for other health conditions related to blood pressure such as hypertension associated with kidney failure or pregnancy. Approximately 50 million people in the United States suffer from high blood pressure or hypertension - more than any other disease. The management of hypertension is critical as high blood pressure can lead to heart disease, stroke, and cardiovascular and kidney failure, among other complications. The Lifeclinic.com web site and vital-signs kiosks empower consumers to better manage their hypertension.

The Chairman and CEO, commented, "We are very excited about the launch of Lifeclinic.com which offers a unique combination of vital-signs monitoring, personal medical record charting and health information. With access to an established community of approximately three million users of the Company's vital-signs kiosks, we have an opportunity to capitalize on a first-mover, leadership position in this space."

The Company also intends to offer a web-enabled vital-signs monitoring e-kiosk in the first half of 2000 that will allow consumers to measure their vital signs and to have those measurements downloaded automatically into their personal health chart at Lifeclinic.com

Spacelabs Medical.(Lifeclinic.com)(Brief Article)(Statistical Data Included)

FULL TEXT

REDMOND, Wash. -- Spacelabs Medical will introduce an Internet-enabled version of its 10,000 blood-pressure monitoring consumer kiosks, which are located in pharmacies and other retail locations across the country.

The e-kiosk will allow consumers to measure their vital signs and to have those measurements downloaded automatically into their personal health charts at Lifeclinic.com, the hypertension-focused Web site Spacelabs launched in December.

In addition to health information and a daily news service, visitors to the site can locate a vital signs kiosk near their homes or shop online for items related to blood-pressure management.

"The number of blood-pressure readings taken at our kiosks each year demonstrates the importance of this service," said chief executive Carl Lombardi, who puts that number at 200 million readings for 3 million individual users each year.

"When people realize they have hypertension, they tend to become very active in tracking its progress," Lombardi commented. "The demographics of the user population and the fact that the kiosks are often located at the point of purchase make Lifeclinic an excellent medium for advertising and merchandising," he added.
